

Table Filters in ZogoTech

How to pull a list of students in my class:

Steps:

Table Filter (On bottom under Special Filters)

Select Table

Student Classes

Add Column

Term

Spring 2014

Add Column

Section Name

(type in name, scroll to select course # & section #)

(add additional courses if you want)

APPLY FILTER

*Don't forget to save the filter or the list if you want to. If you are pulling your class, I would suggest you SAVE CRITERIA. This way, if someone drops, they will automatically be removed from your list.
